01

Executive Summary & Response to Counter Offer v2.0

TeNetSoft acknowledges receipt of Globalgate Inc. 's Counter Proposal v2.0 dated March 2026. After a thorough review of the FIT Score Technical Specification (v1.0), the revised scope document, and all seven technical clarification questions, we are pleased to submit this revised proposal which formally accepts Globalgate's counter-offer terms and addresses every outstanding technical point with a reduction from the original proposed amount.

This revised proposal supersedes our original submission and commits to delivering a **more complete system at USD 25,000** — incorporating all new v2.0 features i.e.

- Score Calculation (P1)
- Web Intelligence
- Hearing Input
- Short List Engine

We will be working on a **8–10 week timeline**,

The system will be built entirely on Globalgate's existing PHP/MySQL infrastructure.

ITEM	ORIGINAL PROPOSAL	GLOBALGATE REQUEST	REVISED POSITION
Development Fee	USD 30,000	USD 20,000	✓ **USD 25,000**
Timeline	3 Months	8–10 Weeks	✓ **8–10 Weeks**
Scope	4 Modules (no Web Intel / Hearing / Short List)	5 Pages + 3 New Features (v2.0)	✓ **Full Scope v2.0**
Infrastructure	AWS + Pinecone/Weaviate	Existing server, no AWS	✓ **Existing Server**
AI Engine	GPT-4o or Claude Sonnet	Anthropic Claude Sonnet	✓ **Claude Sonnet**
Payment	Equal monthly (3 × USD 10K)	Milestone-based (4 milestones)	✓ **4-Milestone Structure**

02

Full System Scope — Phase 1 (GG Intelligence v2.0)

The revised scope covers five core pages (P1–P5) plus three newly confirmed v2.0 features. All components are built on the existing **ma.globalgate-world.com** PHP/MySQL infrastructure and powered by the Anthropic Claude Sonnet API with the Web Search tool enabled.

ID	COMPONENT	DESCRIPTION	OUTPUT / DELIVERABLE
P1	**AI Matching Search (M-1 Module)**	Company name → Claude API 5-step analysis using 4-axis FIT Score formula (Strategic Alignment 30%, Geographic Fit 25%, Financial Scale 20%, Sector Fit 25%) + Bonus/Penalty rules → Scored deal cards with FIT ring display	FIT Score JSON + Deal Cards UI (Green/Navy/Amber/Gray borders per band)
P2	**Valuation Tool (M-3 Module)**	EV/EBITDA calculator, Adj. EBITDA adjustments, sensitivity table — pure JavaScript, no API calls	In-browser valuation worksheet
P3	**Deal List Renewal**	Country filter chips, 3-column card grid, HOT badge (view ≥3 trigger), keyword search, sort controls	Refreshed deal list page
P4	**Deal Detail Page**	Financial panel, NDA request workflow, Non-Name Teaser generation, deal process tracker, "Download IM" button & Non-Name Teaser button (always visible)	Deal detail + NDA flow
P5	**Admin Dashboard**	Hot lead alerts (view ≥3), KPI cards, activity feed, API cost monitor linked to ai_usage_log	Admin control panel
WEB (P6)	**Web Intelligence**	Claude Web Search (web_search_20250305 tool) for three flows: (1) competitor M&A in the same sector/region, (2) buyer mid-term plan IR extraction, (3) overseas subsidiary/expansion search. Results injected as context into the AI matching prompt before scoring.	Enriched AI match prompt; web sources cited in FIT rationale
HEAR (P7)	**Hearing Input Module**	Admin form for GGC staff to log banker/client signals. Stored in hearing_log table (company, sector, region, appetite_score 1–5, budget_range, notes). Auto-referenced in AI analysis for Bonus +5 (appetite ≥4/5) and Exact Country Match +2.	hearing_log DB table + admin form + automatic prompt injection
SL (P8)	**Short List Engine (Reverse Matching)**	Non-Name Teaser text or PDF input → Claude parses: country, sector, revenue, EBITDA, deal structure → Generates candidate pool of Japanese buyer companies → Scores each using same 4-axis FIT formula (deal fixed, buyers scored) → Top 15 ranked candidates with rationale "Download IM" button & Non-Name Teaser button (always visible)	PDF short list (formatted) + CSV export; ***NNT** ** number stored for traceability

**NNT numbers are assigned and managed exclusively by Globalgate.*

***This field is read-only - no auto-generation logic is required.*

03

FIT Score System — Confirmed Implementation (GG Spec v1.0)

Development will follow GG Intelligence FIT Score Specification v1.0 as the scoring framework for the AI matching engine. The **LLM-based scoring via Claude Sonnet prompt** (not a separately trained ML model) will be implemented.

MASTER FORMULA

FIT Score = (A × 0.30) + (B × 0.25) + (C × 0.20) + (D × 0.25) + Bonus − Penalty

All axis scores: 0–100 | Bonus max: +10 | Penalty max: −15 | Final score capped at 100

Four-Axis Scoring Architecture

AXIS	NAME	WEIGHT	DATA SOURCES	IMPLEMENTATION NOTE
A	**Strategic Alignment**	30%	Company IR, mid-term plan (web search), M&A history, hearing log	Scores 0–100 per rubric. Bonus +5 if appetite_score ≥4/5. Bonus +3 for competitor urgency.
B	**Geographic / Regional Fit**	25%	Overseas subsidiary data (web search), IR expansion statements, Region Priority Table	Base regional affinity from Region Priority Table (IN=80, SG=75, TH=70, VN=72). Bonus +2 for exact country match in hearing.
C	**Financial Scale Match**	20%	Annual report, IR financial data (web search), deal DB asking price	If financial data unavailable → assign C=50 (neutral) and flag 'financial_data_unverified: true'. Penalty −5 if C<40.
D	**Sector / Product Fit**	25%	Deal DB sector, Sector Affinity Map, target product description	EV Transition Bonus +3 if target has EV roadmap AND buyer IR includes EV theme. Sector Affinity Map used for classification.

Score Band & UI Action Thresholds

SCORE RANGE	BAND LABEL	UI DISPLAY	AUTOMATED ACTION
80–100	HIGHLY RECOMMENDED	Green border + ⭐ BEST MATCH badge	Auto-generate AI Proposal → Send to banker within 48hrs → Log in hot lead tracker → Escalate to CEO if score ≥90
65–79	RECOMMENDED	Navy border, no badge	Show in results; banker reviews; generate proposal on request
50–64	POSSIBLE MATCH	Amber border + ⚠ label	Include in results with lower ranking; flag gaps; suggest further research
35–49	WEAK MATCH	Gray border, dim display	Show only if top list has fewer than 5 results; labelled as weak match
0–34	NOT RECOMMENDED	Excluded from default results	Available only if user explicitly requests 'show all'

04

Cost Summary & Milestone Payment Structure

.

REVISED DEVELOPMENT FEE	USD 25,000	Phase 1 — Full Scope v2.0 5 Pages + Web Intelligence + Hearing Input + Short List Engine 8–10 Weeks · Existing Server · Claude Sonnet API

Four-Milestone Payment Schedule

MILESTONE	DELIVERABLE CRITERIA	WEEK	AMT ($)
01 — Contract Signing	• Contract executed • DB schema review (incl. hearing_log) • Environment access confirmed	Week 0	**4,000**

02 — Mockup Approval	• All 5 screen mockups approved by GG
	• Web Search API integration tested
	  ○ Tool type: web_search_20250305
	  ○ Implementation: Enabled as a tool parameter in the Claude API call (tools array)
	  ○ Three mandatory web search flows to be tested and demonstrated):
	  ■ Flow 1: Buyer's mid-term management plan, corporate strategy, and IR information (within 3 years, public sources)
	  ■ Flow 2: Buyer's overseas subsidiaries and international expansion status
	  ■ Flow 3: Competitor M&A activity in the same sector and region as the buyer
	• Hearing form wireframe approved
		Week 3	**6,000**

03 — Mid-Term Demo	• AI matching • Web Intelligence live on staging • Hearing input working • Dashboard hot lead alerts verified	Week 7–8	**9,000**
04 — Production Release	• All features live (Short List, PDF/CSV, security verified) • GG final sign-off • Handover complete	Week 10–12	**6,000**
TOTAL	No payment without deliverable approval from Globalgate		**$ 25,000**

05

Technology Architecture

LAYER	TECHNOLOGY	NOTES / CHANGE FROM ORIGINAL
LLM Engine	Anthropic Claude Sonnet 4.6 (sole engine*) Endpoint: API Version Header:	Confirmed. GPT-4o removed. Claude Web Search Tool enabled (web_search_20250305). POST https://api.anthropic.com/v1/messages anthropic-version: 2023-06-01
Vector Search	**NOT REQUIRED — eliminated**	Claude's 200K context window handles all 200 deal summaries in a single prompt. Pinecone and Weaviate removed entirely.
Backend	PHP 8.x REST API (existing system at ma.globalgate-world.com)	No migration required. New /api/ routes added to existing PHP codebase.
Database	MySQL (existing) — 4 new tables added	New tables: ai_match_results (7-day cache), deal_view_log (hot lead), ai_usage_log (cost monitoring), hearing_log. Redis removed — MySQL caching sufficient.
Cloud Infrastructure	**Existing server**	All Phase 1 development and production on the current server.
Document Generation	TCPDF / mPDF (PHP) for Short List PDF export	PDF short list (top-15 buyers) and CSV export for the Short List Engine.
Security	API key in .env | Session auth gate | HTTPS | RBAC	Role check on all /api/ routes. AES-256 at rest for sensitive deal data retained.
Score Caching	MySQL ai_match_results table — 7-day TTL	Cache invalidated on: new hearing note for company, deal data update, or user 'Regenerate' click. Reverse matching cache key: nnt_no + week.
API Cost Control	ai_usage_log table + Admin Dashboard monitor	Every Claude API call logs tokens_in, tokens_out, cost_usd, timestamp, company_name, deal_id. Real-time cost monitor on Admin Dashboard (P5).

**If future changes to the AI engine, models, or underlying technology become necessary, the required system modifications will be undertaken accordingly. Such enhancements or modifications shall be treated as additional paid work, subject to mutual agreement.*

For the duration of Phase 1 (Weeks 0–12), Anthropic Claude Sonnet (claude-sonnet-4-6) shall remain the sole AI engine. No substitution of the AI engine shall be made during Phase 1 without prior written approval from Globalgate Inc. Any substitution without such approval shall be treated as a scope deviation.

Future Approach
As AI technology continues to evolve, we endeavor to use the most capable and suitable models available at each project stage. Any changes to the AI engine will be aligned with project objectives and communicated in advance with Globalgate.

06

Terms, Conditions & Next Steps

Client-Side Prerequisites

- Anthropic API key provided by Globalgate prior to kick-off (Week 0)
- Finalize HTML mockups and PPTX screen specifications
- GG point-of-contact available for design approvals and milestone sign-offs

General Terms

Pricing Validity: This revised proposal is valid for 30 days from the date of issue (25 March 2026).

Change Requests: Any scope additions beyond the v2.0 components listed in Section 2 will be quoted separately before implementation.

Proposed Next Steps

STEP	ACTION	OWNER	TARGET DATE
1	GG reviews this revised proposal and confirms acceptance of terms	Globalgate	Within 3 business days
2	Video call meeting to walk through scope, address any final questions, and align on kick-off	Both parties	Within 1 week of proposal acceptance
3	API key and HTML mockups provided to development team	Globalgate	Week 0 (at or before kick-off)
4	Development commences — Phase 1 kick-off	TeNetSoft	Week 1
